

VINEETH R S

associate software engineer

ABOUT ME

I graduated in 2023 with a degree in Computer Science Engineering and have 6 months of experience as a software developer. I have hands-on experience with React, Java and SQL, basics in python although I consider my knowledge to be average. My professional experience has further ignited my motivation to enhance my skills and apply them in practical settings. I am enthusiastic about expanding my language skills and acquiring new concepts to become a proficient professional. I am eager to join a dynamic team where I can contribute, learn, and grow professionally.

EDUCATION

Bachelor of Technology
St.Thomas Institute for Science
and Technology
(2019-2023)

SKILLS

HTML	CSS
React.js	bootstrap
Java	JavaScript
SQL	MS Office
Python	

LANGUAGE

English
Malayalam
Tamil

REFERENCE

presented project paper at the national conference conducted by The Institution of Engineers India(IEI)

WORK EXPERIENCE

Nov 2023- May 2024

Pivot Systems | Module 14, Nila Building, Technopark Complex
software developer trainee

Working as a JS developer, Hybrid application development and 3Dsimulation designs

PROJECT

Plant Leaf Disease Detection System

The Plant Leaf Disease Detection System, built with the **VGG19** model, highlights AI's role in improving agriculture. This project reflects the **team's expertise** in deep learning for crop management.

College Bus Tracking System

As part of our minor project, our team developed an Android app for real-time tracking of college buses using location sharing. This project showcased our skills in **mobile app** development.

G-Medicine Shop

A web application using **React** and **Spring Boot** to manage medicine inventory. Users can view medicine availability, while shop owners can add, edit, and remove medicines from the database.

Taste it out Recipe

Developed a recipe management system using React and Spring Boot with authentication and authorization, allowing users to create, edit, and view recipes securely.
